PROFESSIONAL SUMMARY

Results-driven QA Analyst with 3 years 5 months of experience at Miko.ai, combining strong manual QA fundamentals with independently developed automation expertise in Playwright (TypeScript) and Selenium (Java) — including three live, self-built frameworks integrated with CI/CD (GitHub Actions, Jenkins). Owned end-to-end quality for 5 concurrent product lines — managing 500+ test cases in TestRail, intercepting ~30% of critical defects before UAT through Postman and REST Assured API validation, and reducing test design time by ~40% through AI-assisted workflows. Experienced in cross-device testing on real Android and iOS hardware, defect lifecycle management in JIRA, and Agile/Scrum delivery. Immediate joiner seeking QA Manual or Automation roles.

TECHNICAL SKILLS

- **Automation:** Playwright (TypeScript) — independently built, self-driven expertise; Selenium WebDriver (Java), Cucumber BDD, TestNG, Page Object Model, Allure Reports
- **Manual Testing:** Functional, Regression, Smoke, Sanity, Exploratory, UAT, Cross-browser, Cross-device, Shift-left
- **API Testing:** Postman, REST Assured — CRUD operations, auth token flows, schema validation, status codes, edge cases
- **Test Management:** TestRail · JIRA · Agile/Scrum · Defect Lifecycle Management
- **CI/CD & Tools:** Jenkins · GitHub Actions · Maven · Git · Docker · Selenoid · SonarLint
- **Languages:** Java · TypeScript · SQL (query-level)

WORK EXPERIENCE

QA Analyst · Miko.ai Oct 2024 – Apr 2026

Stack: Postman · REST Assured · TestRail · JIRA · Maestro · Jenkins · Claude · ChatGPT · Mixpanel · Android · iOS

- **End-to-end test ownership** — Designed, executed, and maintained 500+ test cases in TestRail across 5 concurrent product lines covering functional, regression, smoke, sanity, and exploratory scenarios.
- **API defect prevention** — Led REST API validation before every release using Postman and REST Assured, intercepting ~30% of critical defects before UAT through schema validation, auth token flows, and edge case testing.
- **AI-powered test design** — Integrated Claude and ChatGPT into test planning workflows, reducing test design time by ~40% without sacrificing coverage quality.
- **Cross-device testing** — Executed testing on real Android and iOS hardware, surfacing hardware-specific defects emulators could not detect across IoT and mobile product lines.
- **Defect management** — Logged and triaged 100+ defects in JIRA with structured reproduction steps and severity tagging, reducing average defect resolution time by ~25%.
- **Agile collaboration** — Active contributor in sprint planning, stand-ups, and defect triage; championed shift-left testing by reviewing requirements before development began.

Robot Operator (QA & Product Validation) · Miko.ai Jul 2022 – Oct 2024

Stack: Miko 3 · Miko Mini · JIRA · Motion Analysis · Performance Graphs

- **Functional testing** — Validated robot software on physical hardware — motion sequences, audio, and image content for Miko 3 and Miko Mini across diverse hardware units.
- **Defect reporting** — Logged 50+ defects in JIRA covering motion errors, content mismatches, and interaction failures fed directly into the QA pipeline.
- **Recognition** — Awarded Excellence Performance Award (2023) for outstanding contributions to product quality and team delivery.

PERSONAL PROJECTS — SELF-BUILT AUTOMATION FRAMEWORKS

Playwright TypeScript Automation Framework · github.com/vinayrk77/PlaywrightAutomationFramework
TypeScript · Playwright · Page Object Model · GitHub Actions · API Testing · Node.js

- POM framework with BasePage, LoginPage, DashboardPage — UI and API testing integrated with GitHub Actions CI/CD triggering automatically on every push.

Selenium BDD Automation Framework · github.com/vinayrk77/SeleniumAdvanceFrameworkVinay
Java · Selenium WebDriver · Cucumber BDD · TestNG · Maven · Selenoid · Docker · Apache POI · Allure Reports

- POM with ThreadLocal WebDriver for thread-safe parallel execution, data-driven testing via Excel, Selenoid Docker grid, and Allure Reports.

REST Assured API Automation Framework · github.com/vinayrk77/APIAutomationFrameworkVinay
Java · REST Assured · TestNG · Maven · Jenkins · AssertJ · Jackson API · Allure Reports

- Full CRUD automation with auth token flows, schema validation, and end-to-end integration scenarios. Jenkins CI/CD pipeline integrated.

AWARDS & RECOGNITION

Excellence Performance Award 2023 · Miko.ai

Recognised for outstanding contributions to product quality and team delivery across IoT and mobile product lines.

EDUCATION

Bachelor of Computer Science 2019- 2022

Mumbai University, Mumbai
